

Flush-mounted junction box

Standard version, incl. cover

Flush-mounted junction boxes safely and neatly house larger or more complex electrical connections. They are used where more space for terminals or distribution units is needed than a standard junction box provides, for example in larger residential and commercial installations. The boxes have several metric entries.

DIMENSIONS IN MM	HEIGHT IN MM	PACK QTY	CTN QTY	ARTICLE NO.
80 x 80	45	10	150	305608
100 x 100	45	10	150	305610
