

LED Panel, 60x60, cool white 6000K, 40W, 4400lm, UGR<19, incl. driver

Article Number: WS000003729

Product Description

The LED panel 60x60 cm combines innovative backlight technology, cool white light (6000K), and an impressive brightness of 3960 lumens per panel. With a consumption of only 36 watts, it offers an energy-efficient and sustainable lighting solution for offices, retail spaces, classrooms, conference rooms, hallways, and elevators. The panels are characterized by a UGR < 19 glare rating, providing pleasant lighting with reduced glare—ideal for areas requiring uniform and comfortable illumination. With a lifespan of 50,000 hours, they also save on maintenance costs. The robust frame ensures stability and elegant aesthetics, while the included drivers guarantee top quality. As a replacement for T5 and T8 fluorescent fixtures, these panels are a smart choice for modern lighting solutions.
