Cable clamps

with pre-fitted nail anchor

Cable clamps are used to secure cables and wiring to ceilings. Their compact design also allows installation behind suspended ceilings or partition walls. The practical clamp holds the cables firmly in position. Installation requires a pre-drilled 6 mm hole. A nail anchor, or a screw with an anchor, secures the cable clamp in the hole. The cables are then inserted by lifting the clamp slightly and are held securely. Cables can also be added later: the robust material retains its shape and function even after being bent open.

RoHS ✓ | halogen free | silicone free | PP | RAL 7035

CAPACITY IN MM²	PACK QTY	CTN QTY	ARTICLE NO.
8 x 3 x 1.5	50	800	309031
10 x 3 x 1.5	50	600	309032
16 x 3 x 1.5	50	400	309033

With a pre-fitted cylinder-collar nail anchor, size 6 x 50 mm, for quick and precise installation. After drilling the hole, simply hammer in the anchor. Our HUP XpressFixx® products enable strong, accurate and particularly quick installation.
