

VDE flush-mounted device boxes

Pallet packaging

(25 pcs packed in a poly bag)

Flush-mounted device boxes are designed for installing electrical devices in masonry. They can also be used as junction boxes by fitting a universal cover. They securely accommodate sockets, switches, network outlets and other built-in devices, ensuring firm installation in the wall in accordance with the applicable standards. The boxes have metric entries and connecting spigots on both sides for joining adjacent boxes.
