

EAN:	4013288233974	**Size:**	230x70x45 mm
Part number:	05051517001	**Weight:**	289 g
Article number:	Kraftform Kompakt 27 RA 1	**Country of origin:**	CZ
		Customs tariff number:	82054000

- The ratchet with fine toothing integrated in the handle allows fast working
- The innovative ratchet mechanism also allows fast "spinning". A real problem solver when there is no resistance from the screw
- Intuitive switching: If I turn the switch clockwise - the ratchet turns clockwise, if I turn the switch counterclockwise - it goes counterclockwise
- Integrated bit magazine with 6x 25 mm bits
- BiTorsion Bits
- Take it easy tool finder: colour coding according to profile and size
- Universal holder with stainless sleeve and strong permanent magnet

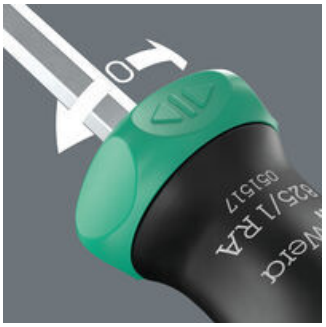

Kraftform bitholding screwdriver for 1/4" hex drive bits. The ratchet with fine toothing integrated in the handle allows fast working. Switching the screwdriving direction is intuitive: Turn the ring switch clockwise for clockwise screwdriving, turn it counterclockwise for counterclockwise screwdriving. Use position 0 to deactivate the ratchet mechanism for precise working. Includes 6 BiTorsion bits for a long product life, tough, for universal use; stored in the bit magazine integrated in the handle. The strong permanent magnet in the 1/4" bit mounting ensures secure holding of the bit. The 2-component Kraftform handle with the combination of hard and soft zones allows for a firm grip and precise working.

Innovative ratchet mechanism

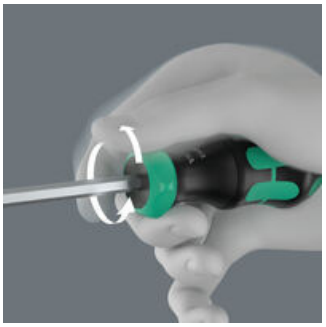

The ratchet with fine toothing integrated in the handle allows fast working. The innovative ratchet mechanism also allows fast "spinning". A real problem solver when there is no resistance from the screw.

Intuitive switching, and deactivation of the ratchet functionality

Intuitive switching of the ratchet mechanism. Turn the switch clockwise for clockwise screwdriving; turn it counterclockwise for counterclockwise screwdriving. Use position 0 to deactivate the ratchet mechanism for precise working.

Ratchet mechanism allows "spinning"

The innovative ratchet mechanism also allows fast "spinning". A real problem solver when there is no resistance from the screw.

Handle with integrated bit magazine

The handle can be opened and thus gives access to the six bits contained in the magazine.

Universal holder with stainless steel sleeve

With stainless steel sleeve and strong permanent magnet.

BiTorsion Bits

Peak forces that occur in power tool applications often result in premature wear of bits or damage to the screw head. This usually occurs during initial power-up and the when the screw comes to a standstill. Screwdriving could become more productive and safer if these peak loads could be minimised. The Wera BiTorsion system prevents premature wear. The service life of the tool is extended and the productivity of power tool applications significantly increased.
