Light in constant evolution

With over ten years of proven success and millions of units installed worldwide in various environments, GUELL is the long-established LED floodlight range designed to adapt. The series offers the ideal combination of power, efficiency, and durability, whether for non-professional sports facilities, retail storefronts, attics and cornices, or the exterior of industrial and commercial sites.
With the introduction of GUELL ZERO+, 1+, 2+, and 2.5+, now complementing the existing GUELL 3, and 4 models, the range offers even greater design flexibility. The latest versions feature improved thermal management and increased luminous efficacy, with values that, in specific configurations, can reach up to 154 lm/W. The familiar and cohesive design across sizes ensures visual and functional harmony within the same installation, even when using different power levels.
The powder-coated die-cast aluminum body, extruded aluminum clips, and tempered extra-clear glass guarantee strength and resistance in demanding environments. The tool-free quick-access system simplifies access to internal components, reducing maintenance times, while a comprehensive selection of dedicated accessories supports compliance with strict light pollution regulations. Moreover, the glue-free design and replaceable components make the product fully inspectable and entirely recyclable, contributing to more sustainable resource management.
For precise, reliable, and long-lasting lighting, GUELL is the answer.

Features & benefits

- Wide range of versions
- Wide range of accessories
- Openable and maintainable luminaire
- Multiple light distributions
- For up lighting installation
- Designed to last
- Surge protected
- Excellent heating dissipation
- Constant luminous flux over time
- DALI versions available
- Compliance with anti-light pollution laws
- High quality BIM objects available
