Perforated mounting straps - plastic-coated

in dispenser carton

Perforated mounting straps are a proven aid in electrical installations for securing conduits and cables securely and flexibly, particularly on unfinished floors or in concrete ceilings. When installing conduits on floors, our straps keep them firmly in place before the screed or concrete is poured. They can be cut to length and easily adapted to site conditions. The regularly spaced perforations allow quick fastening, for example with knock-in anchors.

RoHS ✓ | SV | RAL 9005

WIDTH IN MM	LENGTH IN M	SLOT LENGTH IN MM	HOLE Ø IN MM	PACK QTY	CTN	ARTICLE NO.
14	10	10.5	5.2	1	20	311121-KARTON
19	10	15.0	6.5	1	20	311124-KARTON
27	10	16.0	8.5	1	15	311134-KARTON

The perforated mounting strap is supplied in a convenient dispenser carton. It can be pulled out in sections without opening and unwinding the entire roll. No large shipping packaging is needed to protect the strap itself or other, more fragile items.
