Diamond tools for drilling and cutting

- reliable, robust and built for demanding use

Premium with extraction holes

Reliable tools are essential when installing device boxes in masonry. Our range of proven diamond tools and matching accessories helps installers work precisely and cleanly, particularly in hard building materials such as concrete, calcium silicate brick and brickwork. Our diamond core bits produce accurate holes with clean edges and offer a long service life. A matching centre drill ensures secure guidance, makes it easier to start drilling and helps achieve clean results. We also offer suitable solutions for cutting: our diamond cutting discs are robust, durable and suitable for many common cutting tasks on site. Matching dust extraction systems significantly reduce dust and dirt for more efficient, safer and cleaner working. Easy handling, dependable quality and ready for use - the right accessories for everyday site work.

CE ✓ | halogen free | silicone free

DIMENSIONS IN MM	NUMBER OF SEGMENTS	PACK QTY	ARTICLE NO.
68 x 60	3	1	480121
82 x 60	4	1	480122

Suitable substrates: hard calcium silicate brick, Quadro blocks (bulk density up to 2.0), concrete and reinforced concrete (with soft impact). Dimensions per segment: 24 x 3.5 x 10 mm. Connection: M16. Required centre drill length: 120 mm.
