Nail discs

with 3.5 mm nail diameter

The nail disc is made of robust plastic and has a central opening for the nail. Its wide support surface holds cables and wiring securely without damaging them. It is used to secure electrical cables quickly and reliably to masonry or in concrete chases by hammering in the nail. The product is available with nail lengths of 30 mm - 70 mm and various nail diameters to suit the application.

RoHS ✓ | halogen free | silicone free | PP | SV | NATURA
