SFC – SlimFix Clip MultiCard with two labelling fields

For conductor markers, it is often required to quickly read the start and destination designation of the respective conductor. Here it makes sense to print both data directly on a marker.

The new SFC-DS markers are designed as MultiCards and are suitable for direct printing with our PrintJet printing system. Their two labelling areas allow multiple data to be printed on a single marker. The print data can be imported directly from CAE projects into the M-Print® PRO marking software. After printing, the markers are placed around the conductor and securely fixed with a special locking mechanism.
