

Cavity wall device boxes 2K

Cavity wall device boxes are designed for installing electrical devices in drywall. They can also be used as junction boxes by fitting a universal cover. They securely accommodate sockets, switches, network outlets and other built-in devices, ensuring firm installation in accordance with the applicable standards. The boxes are inserted into cut-outs in the drywall and securely clamped using the integrated lugs. The airtight membrane entries make this version suitable for installations where airtightness is required.

HEIGHT IN MM	Ø IN MM	PACK QTY	CTN QTY	ARTICLE NO.
48	68	25	250	306048-2K
61	68	25	200	306067-2K

The membrane provides an airtight seal, particularly suitable for use in low-energy houses.
