844/7 Tap bit set, 8 pieces

EAN:	4013288233042	**Size:**	140x100x30 mm
Part number:	05104754001	**Weight:**	177 g
Article number:	844/7 2025	**Country of origin:**	CZ
		Customs tariff number:	82075060

- Ideal for mobile repair and assembly work
- Rapidaptor holder for rapid bit change
- 1/4" drive suitable for power screwdrivers
- Rapidaptor universal holder, non-magnetic, and tapping drill bits with 1/4" drive
- In a robust folding pouch with Wera 2go compatibility

7-piece tap bit set in a robust 9499 folding pouch. For cutting metric threads. The hexagonal shaft of the bits allows very good power transmission. The granular material elasticity ensures long service life. Perfect chip removal and low risk of tilting. The Rapidaptor ensures lightning-fast bit changes without any extra tools. 1/4" hexagon, suitable for holding tools as per DIN ISO 1173-D 6.3.

Tap cutting bits

Tap cutting bits Application: Cutting threads
1/4" drive suitable for holders as per DIN 3126-D 6.3 (ISO 1173)
Hexagon shaft for very high torque transfer
Finely adjusted material elasticity for long service life
Excellent centring properties
Straightforward cutting
Perfect chip removal
Low jamming risk
Precise return control
High corrosion protection

Rapidaptor holder

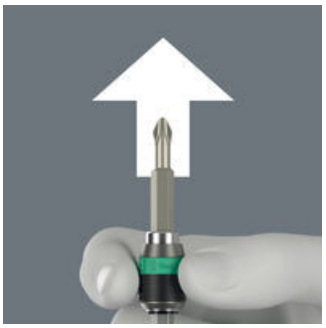

Lightning-fast bit change without any extra tools. One-handed operation. With fast-rotating sleeve for easy wielding of the screwdriver.

Rapid-in and self-lock

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

Rapid-out

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

Chuck-all

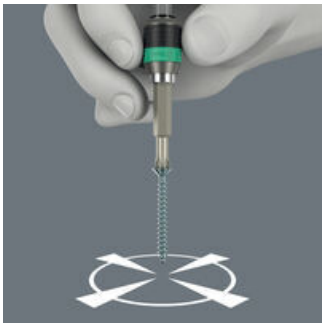

The Rapidaptor quick-release chucks hold ¼" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

Single-hand function

Every function of the Rapidator quick-release chuck, such as inserting or releasing bits, can be carried out with one hand. This is faster, more economical and more ergonomic. There are no unnecessary manoeuvres.

Rapid-spin

The free-turning sleeve allows screw steadying at the start of the screwdriving process. This makes it easier to apply the tool to the screw and prevents slipping. It can also be used as a short extension for ¼" applications e.g. in combination with the Wera Zyklop Ratchets.
